See back of form for additional questions, Part II Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ► The issuer determined that 19.449732 % of the dividends paid between January 2023 and November 2023 (Investor, Advisor, and I Classes) were non-taxable return of capital. Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ See attachment for per share distributions that should reduce the cost basis of your shares held as of payment date. Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ► A tax return of capital occurs when a fund pays out more in dividends than its current and accumulated earnings and profits determined for tax purposes. Due to events after the relevant distribution dates, the fund determined that the dividends paid have exceeded its current and accumulated earnings and profits for the relevant taxable year. The excess represents a tax return of capital paid by the fund, instead of a dividend.
