Target Trust	Class D	32 bps		✓
Target Blend Trust	Class D	17 bps		✓

The fee aggregation pricing policy allows OneDigital 3(38) clients more flexibility to choose the most appropriate investment solutions for plans based on their goals and characteristics. As an example—if you have clients and assets in the higher equity glide path Retirement Date Strategies—you can now offer clients the lower equity Target Date Strategies (in all active or active/passive blend) at the same attractive price breakpoint. So, whether a client is looking to maximize spending power or reduce volatility at the point of retirement, we are able to offer you both options without pricing being a limitation.
