Investment Objective & Strategy

The fund seeks long-term growth of capital by investing primarily in the common stocks of companies located (or with primary operations) in Africa and the Middle East. Favor companies with attractive valuations and earnings that are growing faster than their local, regional, or global peers.

Securities are chosen based on bottom-up research, supported by a top-down perspective.

A focused portfolio leading to high-conviction decision-making.

Country allocation is driven by stock selection.

Performance data quoted represents past performance and is not a reliable indicator of future performance. Investment return and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data quoted. To obtain the most recent month-end performance, visit troweprice.com

The average annual total return figures reflect the reinvestment of dividends and capital gains, if any.

The T. Rowe Price Fund shares the portfolio of an existing fund (the original share class of the fund is referred to as the "investor class"). The total return figures for this I Class have been calculated using the performance data of the Investor Class up to the inception date of the I Class (3/6/17) and the actual performance results of the I Class since that date. Because the I Classes are expected to have lower expenses than the Investor Classes, the I Class performance, had it existed over the periods shown, would have been higher.

⁽³⁾Effective July 1, 2018, the "net" version of the benchmark replaced the "gross" version of the benchmark. The "net" version of the benchmark assumes the reinvestment of dividends after the deduction of withholding taxes. Historical benchmark representations have been restated to show net of withholding taxes. Effective January 1, 2018, the benchmark was changed to the MSCI Arabian Markets & Africa 10/40 Investable Market Index Net. Prior to January 1, 2018, the benchmark was S&P Emerging Market/Frontier Middle East & Africa Broad Market Index ex Israel Net. Prior to September 30, 2010, the benchmark was MSCI Arabian Markets and Africa Index Net. Prior to July 1, 2009, the benchmark was S&P IFCG Africa and Middle East ex-Saudi Arabia and ex-Israel Net. Prior to September 1, 2008, this benchmark also excluded Kuwait. Historical benchmark representations have not been restated.

The fund(s) may have other share classes available that offer different investment minimums and fees. See the prospectus for details.

Risks: Emerging markets: Investments in emerging market countries are subject to greater risk and overall volatility than investments in the U.S. and other developed markets. **International investing:** Non-U.S. securities tend to be more volatile and have lower overall liquidity than investments in U.S. securities and may lose value because of adverse local, political, social, or economic developments overseas, or due to changes in the exchange rates between foreign currencies and the U.S. dollar. See the prospectus for more detail on the fund's principal risks.
