INVESTMENT OBJECTIVE AND STRATEGY

The fund seeks the highest total return over time consistent with an emphasis on both capital growth and income.

The fund is actively managed and invests in a diversified portfolio consisting of about 40% stocks and 60% bonds.

The fund will implement its strategy by investing in a set of underlying T. Rowe Price mutual funds.

BENEFITS AND RISKS

The fund offers a professionally managed, diversified investment program. Diversification does not assure a profit or protect against loss in a declining market.

The asset allocations are based on what T. Rowe Price considers broadly appropriate to investors during their retirement years.

The fund has competitive expenses and no additional charges for asset allocation and portfolio management.

Stock prices can fall because of weakness in the broad market, a particular industry, or specific holdings. Bonds may decline in response to rising interest rates, a credit rating downgrade or failure of the issue to make timely payments of interest or principal.
